Wireless 2.4GHZ Travel Mouse

With this compact wireless 2.4 GHz travel mouse with nano receiver you have a compact and precise pointing device for your computer. Because of the 2.4GHz technology, you will have no interference with other wireless peripherals anymore. Thanks to the unique design of the USB nano receiver it can easily be snapped into the bottom of the mouse, or it can be left in the USB port of your computer, notebook or netbook. Additionally, you can switch the dpi setting between 800 and 1600 upon your personal preference.

Highlights

- Ergonomic design
- Compact USB nano receiver, protrudes only 10mm from the USB port
- Precise optical technology
- Wireless 2.4 GHz technology: no interference with other wireless peripherals

Orderinformation

Product Code :	CLLMTR24WL
